

CITIESALIVE!

WORLD GREEN ROOF INFRASTRUCTURE CONGRESS

CITIESALIVE STUDENT DESIGN COMPETITION 2009

The 'CitiesAlive World Green Roof Infrastructure Congress' takes place in Toronto Canada on October 19 - 22 2009 (www.citiesalive.org). Addressing the theme "Green Roof Infrastructure: A Global Solution to Climate Change", CitiesAlive aims to raise awareness of the benefits of green roof infrastructure and to build capacity of the green roof infrastructure market through an international exchange of information, and via local education, training and accreditation opportunities.

ANNOUNCING... THE 2009 CITIESALIVE 'TRANSFORMING THE FACE OF BUILDINGS' STUDENT DESIGN COMPETITION

This design competition challenges students to rethink the facade and roofs of buildings and the way they connect with the surrounding landscape. Roofs and walls provide an excellent opportunity for providing infrastructure and ecosystem services in urban settings. The CitiesAlive Student Design Competition requires multi-disciplinary approaches by participants to focus on the issues of connecting buildings across city blocks, considering sustainable uses of the walls and roofs and creating a seamless transition between buildings and the surrounding landscapes.

CHALLENGE

The program for the CitiesAlive Student Design Challenge is to transform a city block by using the exterior and interior surfaces and spaces of the buildings in a manner that ecologically unifies them with the surroundings and addresses challenges of climate change.

DATES

Submissions Deadline	September 30, 2009
Prize winners chosen	October 8, 2009
Entries Exhibited at CitiesAlive Congress	October 20, 2009
