

invites you to attend the

**Sandton Convention Centre Conference**

7 - 8 July 2009

All major construction projects should be commissioned as 'green buildings' and those that are not will face severe criticism and a potentially reduced future value, as pressure mounts from investors, property owners, blue chip tenants (public and private), and the professional team.

The reason for this pressure is that buildings have a massive and extended impact on the environment and all stakeholders are beginning to understand the magnitude of the opportunity lost when project owners and managers fail to embrace the principals of green building.

The Green Building Conference and Exhibition is geared towards the professional team and seeks to provide valuable and applicable insights from a select group of local and international speakers.

Event partners include the Gauteng Institutes for Architecture, the Commonwealth Association of Architects, the Council for the Built Environment and the EnerKey Program of the University of Johannesburg. CPD points will be available for architects, engineers and quantity surveyors.

The Green Building Conference and Exhibition will again welcome property owners, regulators, built environment professionals, academics and representatives from all facets of the construction industry as delegates to the conference and visitors to the exhibition, which will open to all consumers for the full two days.

# Sandton Convention Centre

7 - 8 July 2009

Green Building Exhibition

## THE OPPORTUNITY

Join the world leading authorities on sustainable development while they engage and educate South Africa's leading architects, engineers, property owners and construction professionals on the latest trends, technologies and materials available in the green building movement. Showcase your green products and services in a vibrant, interactive environment where you will have the ability to interact one on one with built environment professionals specifically seeking products and services that they can incorporate into their next projects that are readily available in South Africa. Enjoy many opportunities to promote your organization to this audience including your company profile in the on-site programme guide, the event web site and pre-event marketing materials.
