The Living Building Challenge is attempting to raise the bar. It defines the most advanced measure of sustainability in the built environment possible today and acts to diminish the gap between current limits and ideal solutions. This certification program covers all building at all scales and is a unified tool for transformative design, allowing us to envision a future that is Socially Just, Culturally Rich and Ecologically Restorative™.

The mission of the International Living Future Institute is to encourage the creation of Living Buildings, Sites and Communities in countries around the world while inspiring, educating and motivating a global audience about the need for fundamental and transformative change.

UNDERSTANDING THE

LIVING BUILDING CHALLENGE™

This workshop provides a 6-hour indepth introduction to the Living Building Challenge. Attendees are the green building leaders in their community: design professionals, contractors, developers, owners, government officials and employees of public agencies. In short, anyone and everyone who can impact the development of the built environment.

Learning Objectives:

- Identify the key components of the Living Building Challenge
- Discuss the rationale for restorative design principles
- Understand successful strategies for compliance with each performance area
- Recognize financial, regulatory and behavioral barriers and incentives related to high performance design
- Describe the Living Building Challenge Community resources and certification process
