EcoStar Offers Majestic Slate™ Beveled Tiles

Mundelein, IL. – EcoStar™, a leading manufacturer of premium steep slope roofing products, offers Beveled tiles as part of the Majestic Slate™ Designer Series. The family of Majestic Slate Designer Series includes Beveled, Chisel Point and Beaver Tail tiles; all manufactured using 100 percent recyclable rubber and plastic polymers. EcoStar continues to lead the industry with earth-friendly, architectural options to slate.

With a distinct Victorian style, the Beveled tiles' scalloped edges offer historic appeal. Accepted in multiple historic districts across the United States, the aesthetic appeal and unique color palette of the Beveled tiles look exceptional alone or intermixed with Majestic Slate traditional tiles. With a variety of combinations, EcoStar is the only roofing manufacturer that can provide this wide range of unique designs and architectural choices.

In addition to its aesthetics, Beveled tiles are exceptionally durable, withstanding hail, driven rain and high winds. Featuring a Gold Star or Limited Materials warranty and available with a 100 mph wind warranty, the tiles will not curl, crack, break or rot. With strength and longevity as its attributes, Beveled tiles eliminate the burden of extreme weight. The tiles weigh a total of 1.26 pounds each, alleviating stress to buildings and injury problems for applicators.

EcoStar is a division of Carlisle Syntec Incorporated. Specializing in premium steep slope roofing, EcoStar continues to launch evolutionary roofing products that offer beauty, quality, sustainability, and performance.
