**We are now Green Roof Innovations, a division of SHADE Consulting, LLC.**

CARMEL, CA. Dear Friends and Associates,

In response to popular demand we are now: **Green Roof Innovations**, a division of SHADE Consulting, LLC.

**Green Roof Innovations** (GRI) provides high quality, durable technology for rooftop vegetation systems and is differentiated from other companies by our simple, engineering-based approach that is both versatile and economical.

GRI proudly announces **Q-Calc™**, our revolutionary energy & cost analysis tool for roof systems, the *first* to include vegetated roofs.

GRI creates affordable, adaptable green roof designs with our modular **SHADEWARE™** products, including the **MiniHex™** and **GreenSquare™** Modular systems.

GRI offers the most comprehensive heat transfer analysis in the green roof industry.

GRI conducts cost-benefit analyses and feasibility studies for building vegetation systems.

GRI analyzes storm water control potential of building vegetation systems.

GRI designs and conducts customized seminars on building vegetation and energy analysis.

Please visit our new website [www.grinnovations.com](http://www.grinnovations.com) for more information about these exciting developments! Let us know how we can help you to grow a new roof!

Chris & Wendy Wark, **Green Roof Innovations**
