

BCIT Centre for the Advancement of Green Roof Technology
represented at Earth: World Urban Festival (June 21-25, 2006)

While international delegates discuss the future of the world's cities and urban environments at **World Urban Forum III**, the UNESCO-designated **Earth: World Urban Festival** will present the roles of art, culture, music and dance in shaping and defining our cities and urban experiences.

BCIT Centre for the Advancement of Green Roof Technology (CAGRT) and its Green Roof Research Facility are located at the Great Northern Way campus where the Festival will take place June 21-25th. As the post-industrial landscape around the facility transforms into a festival of music, theatre, dance, video, dialogue and celebration, CAGRT will showcase engaging green roof workshops, interactive displays, and green roof tours.

Please stop by CAGRT during this exciting event! Participate in a workshop to build an extensive green roof from the bottom up; perceive the beneficial effects through an interactive real-time display; learn about green roof components through interpretive displays; join a green roof tour; and learn about CAGRT's latest findings!

WHEN June 21- 25, 2006 (10:00 am – 8:00 pm)

WHERE EARTH: World Urban Festival,
Great Northern Way campus, Vancouver, B.C.

- between Clark & Main St. on Great Northern Way
- near VCC/Clark Skytrain station
