Turning Green

This conference aims to develop the local know-how needed to overcome the technical, economic and political challenge of widespread green roof installation and ecological construction in Montreal.

12 workshops, 4 panels and 2 plenary sessions for :

- building industry professionals
- governments
- public administrations
- community organisations
- housing cooperatives
- property owners and building managers
- the public at large

Four panels, bringing together experts from different areas, will aim to identify courses of action for a widespread greening of Montreal's buildings.

Two plenary sessions will give participants a chance to be inspired by the examples of important actors in green roofs and sustainable buildings from Montreal, Quebec, Toronto, Chicago and Minneapolis.

For urban greening and ecological construction in Montreal, **three themes** to be explored during the conference :

1. Industry : technical capacity and synergy (CAP)
2. Greening your roof : awareness, residential and institutional project development (GR)
3. Policies and programs (POL)

Simultaneous translation available during panel and plenary sessions

**Trade show booths available, for reservation,
contact : Jacob Nerenberg at (514) 281-8381**
