Urban ^{and} Farming

Linda Velazquez

Publisher & Editor

Greenroofs.com, Atlanta, GA

Green Roofs are now familiar, but Green Walls are the new visual eye candy for urban landscapes. This latest trend in Green Technology can provide a visual tapestry, environmental benefits and a revolutionary approach to food security and green jobs. Linda will run through her "Top 10 Trends" in both Green Roofs and Green Walls as discovered through her writing research and on her worldwide travels in search of the many nuances inherent in the color green.

Bill Brigham

Landscape Architect

Atlanta City Hall
Pilot Green Roof

Bill will show off Atlanta's 1st public non-irrigated Green Roof

George Irwin

Chairman & CEO

Green Living technologies, LLC
Rochester, NY

George will share his extensive knowledge of green wall systems. Because of the relatively new applications of "Vertical Gardens", this course will define the commonly used nomenclature of the industry and address the variety of products, plant material and growing medias used within these systems. In addition Mr. Irwin will address the ground breaking application of vertical farming and its economic and social benefits.

Thursday
July 22nd, 2010
